Happy Cell Story

You have approximately one hundred trillion cells in your body. Today, we are going to visit one of those cells. It is a happy little cell. It is busy doing exactly what it was born to do. It has a wonderful life. It has purpose, reason for being and it is happy.

With every breath that you take, the lymph moves through your body. It gently caresses the cell, bringing it oxygen and nutrients. It bathes the cell and carries away the toxins produced by the cell.

Then one day, you experience a physical, mental or emotional stress in your life. And you hold your breath in response to this stress. You begin to breathe in shallow breaths, which no longer pump the lymph through your body. Our happy little cell no longer gets its full body massage with each breath that you take. The amount of oxygen and nutrients reaching the cell is decreased. The cell begins to struggle for survival.

The toxins begin to build up around the cell. The fluid around the cell becomes stagnant and parasites begin to move in. Parasites serve the purpose of cleaning up decayed matter. However, they also enjoy eating the nutrients which were meant to go to the cell. Plus the stagnant fluid soon becomes filled with debris and toxins being given off by the parasites. It has become a perfect hiding place for more parasites to move into. More cells are suffocated and starved, setting up an arena for inflammation, infection and chronic degenerative conditions.

There is no longer a life-sustaining environment for our little cell. No longer happy, the cell begins to degenerate. It can no longer carry out its purpose and soon it dies.

One cell out of a hundred trillion has little meaning, but when the numbers begin to multiply symptoms of degeneration begin to appear. You may feel more tired than usual. Headaches, constipation, indigestion, lethargy and mood swings are all symptoms of a body in decline. Some call it aging, others call it stress, in reality - it is a body without the Breath.

The good news is that these symptoms often serve as a catalyst to warn you something is going wrong. You have the choice to do something positive to make a difference or take a pill to decrease the discomfort and let the condition accelerate. There are many things that you can do to begin to make a difference. The first step to restoration is doing something to restore the flow and amplitude of the Breath of Life throughout your body.

As you begin to Breathe, the lymph begins to move. It washes through the area where the happy cell used to live. It cleanses the toxins and debris. Now, it is no longer a positive environment for the parasites and they leave, or are exposed and are destroyed by your immune system. The area soon becomes flooded with oxygen and nutrients. Within our body is the perfect blueprint for the rebirth of a cell.

A new cell is created. It is a happy little cell. It has purpose and a reason for being. As the lymph moves with each Breath that you take, the cell receives a full body massage. The lymph gently caresses the cell, bringing it oxygen and nutrients. It bathes the cell and carries away the toxins produced by the cell. The cell is a happy little cell.

Body-Balancers

(1 pair of 1 1/4" wide x 6" long purple acrylic bars)

**Release deeply embedded disharmonic emotional energies,
to help bring *Balance* and stability in the systems of the body!**

The skeletal, muscular, reproductive, digestive and fat storing systems are all inter-related. Imbalances in these systems lead to physical weakness, overall distress and weight problems. Scientific studies show that imbalances in these systems stem from survival issues and when you experience stress your body reacts according to its survival instincts. Releasing the stress within the emotional body, by using harmonic energies to restore the resonance of acceptance, creativity, self-esteem, trust and security plus other positive attributes, while stimulating the energy within the glandular system, restores the natural flow of energy to re-establish overall

rejuvenation, strength and tone to your body. Many struggle with weight, trying one exercise and diet program after another with no lasting results. May I suggest, when the emotional body is in balance it will be easier to tone, strengthen and sculpt your body according to your desire. Using the *Body-Balancers* along with a good diet and exercise program may give you the edge you have been looking for. Many report they actually gained weight in the beginning as muscle tissue was building and fluids rebalanced. Then as the body began to tone and strengthen, excess weight began to drop. - Ann Marie Work

Relieving the buildup of negative electrical charges within the emotional body, restores the natural flow of energy, re-establishing balance and harmony, which creates a positive affect on the overall level of wellness, rejuvenation, strength and tone of your body.

There is a gigantic metropolis of communication required for cell reproduction, transportation of nutrients, oxygen and waste products, metabolism, rejuvenation and rebuilding plus, libraries of knowledge and wisdom, etc. It is imperative to release static - repair circuits - re-establish balance and harmony within all communication and function.
